

On the occasion of the Hospital Foundation Day on April 16, 2025, the Central Hospital authority organized a vaccination drive for Special Attendants, both male and female. Around 43 Ayahs received vaccinations (Hepatitis B) as part of the initiative. This effort prioritized the health and well-being of the hospital's support staff. The vaccination drive reflected the hospital's commitment to caring for its employees. It was a thoughtful gesture on a celebratory day.
