

- ❖ A webinar on fire safety was conducted virtually by Ministry of Health and Family Welfare (MoH&FW) at Central Hospital, GRC, SER on April 21, 2025. The session focused on fire preventive strategies, electrical fire safety, and emergency evacuation. Patient safety strategies in healthcare facilities were also discussed. The webinar covered essential DO's and DON'Ts regarding fire safety. PCMD/SER and its secretariat attended the webinar. IRHS doctors and other medical staff from Central Hospital also participated. The aim was to enhance awareness and preparedness for fire safety and emergency response. The virtual mode allowed for wider participation. The session emphasized the importance of fire safety protocols in healthcare settings. The webinar provided valuable insights for improving safety measures. A Pledge has also been taken by every individual present in this webinar to prioritize and implement fire safety measures.

- ❖ A fire safety demonstration was conducted at Central Hospital's kitchen courtyard by GRC Fire Brigade officials. IRHS doctors, nursing staff, and other hospital staff attended the event. Three types of fire extinguishers were demonstrated: CO2, foam, and powder-based Fire Extinguishers. The demonstration aimed to equip staff with practical knowledge on fire safety and extinguisher usage. The event was successfully conducted, enhancing the hospital's preparedness for fire emergencies. During this fire safety week, Mock drill on fire safety was also conducted to make the staff to deal the emergency situation efficiently.

- ❖ A Posters making as well as Quiz competition regarding Fire Safety measures have been conducted among the staff of all levels of all the departments at the Central Hospital, GRC. SER. Two members from each department participated in these competitions, showcasing great enthusiasm and knowledge about fire safety measures.
