SOUTH EASTERN RAILWAY

DISTANCE TABLE NO. 4

–: Containing :–

Kilometric distances for local and through booking of Coaching, Goods and Coal Traffic between –

(1) **Each station and every other station over South Eastern Railway upto and inclusive of adjacent junction station on either side.**

(2) **Each local junction and every other local junction/junction of inter-change with other connected Railways.**

(TO BE USED IN LOCAL BOOKING AND THROUGH BOOKING WITH OTHER CONNECTED RAILWAYS)

IN FORCE FROM 01.05.2003

M. R. Ramakrishnan
Chief Commercial Manager
South Eastern Railway,
Kolkata

V. N. Garg
General Manager
South Eastern Railway
Kolkata

N.B.– This supersedes Local and Junction Distance Table No.3. of 1994 and amendments by subsequent circulars issued from time to time by South Eastern Railway.

CONTENTS

GENERAL INSTRUCTIONS

1. The distances notified in this table are to be used for local and through booking of all descriptions of goods, including coal and coaching traffic between stations on this railway and via the junctions of interchange with other railways.

   It should however be ascertained from the current Alphabetical List of Railway Stations issued by the Indian Railway Conference Association whether the particular station for which distance is required is open for booking and the description of traffic for which it is open. For restriction of booking, routing instruction etc. the following particulars should also be referred to:–

   i) Current IRCA Goods Tariff.
   ii) Current IRCA Coaching Tariff.
   iii) Current IRCA Red Tariff.
   iv) Current IRCA Military Tariff.
   v) Current General Order (Rationalisation Scheme).
   vi) Other relevant documents.

2. The distances notified in this table are by the physically shortest route via this railway without taking into account the weightage for transshipment wherever involved. For the purpose of determining the shortest route, in the case of Goods Traffic, a weightage as laid down in the IRCA Goods Tariff in force should be given for each break of gauge transshipment.

   While calculating chargeable distance for Goods traffic Rule No.125 as laid down in the IRCA Goods Tariff.Pt.I,Vol.I should strictly be followed:

   Note : In the cases where forwarding & destination stations are situated over South Eastern Railway but the shortest route is via other Zonal Railway, distance should be calculated in terms of Rule-125 and Foreign RRs should be issued.

3. For coaching traffic chargeable distance should be calculated in accordance with rules laid down in the current IRCA Coaching Tariff,Pt.I,Vol.I. Accordingly the distance for passenger and their luggage should be calculated by carried route.

4. In cases where distances are required by the routes other than those provided for in this Table, reference should be made to the office of the Chief Commercial Manager, South Eastern Railway, Kolkata.

5. Goods and Coaching distances are shown separately in some sections where chargeable distances for these traffic are different and wherever these are not shown separately the distances shown are applicable both for goods and coaching traffic. To arrive at the distance for charge, any fraction of a kilometre is taken as one kilometre.

   a) For calculating distances from Part-II of this distance tables for coaching traffic from the junction station Chandil side towards Asansol junction (beyond ADRA) and vice versa a distance of 4.62 Km. Is to be added (for routing via Adra junction) to the notified distance.

b) Similarly for ascertaining chargeable distances for coaching traffic from Part – II of this Distance Tables from junction stations South of Anara (inclusive) side towards junction station Bhojudih and beyond and vice-versa a distance of 20.04 Km. is to be added (for routing via Adra junction) to the notified distance.

6. HOW TO ASCERTAIN DISTANCE FROM THE DISTANCE TABLES :

The distances shown in this table are in two parts as detailed below :

Part-I : Shows distance in Kilometres between each station and every other station upto and inclusive of the adjacent junction station on either side of this Railway.

Part-II : Shows distance in Kilometres between each local junction to every other local Junction/junction of interchange with other connected Railway.

The chargeable distances are to be calculated with the help of the distances shown in the above two parts as explained below :

LOCAL DISTANCE :

(a) The chargeable distance between a pair of station situated in the same section can be ascertained from the rounded off distance as shown in the tables under Pt.I.

Example :

	Station from & to	Reference in Pt.I	Distances in Kms.
i)	Sankrail to Mecheda	Sntragachi - Panskura Sec.– Pg-4	43 Kms
ii)	Tata to Rairangpur	Tata – Badampahar Sec. – Pg-8	65 Kms
iii)	Rupsa to Ranital	Rupsa – Bhadrak Sec.– Pg-18	73 Kms
iv)	Sudamdih to Malkera	Bhojudih – Mohuda Sec.– (via JC) Pg-24	24 Kms

(b) The chargeable distance between a pair of station situated in different sections can be ascertained by adding actual distance from originating station to its adjacent junction, the destination station to its adjacent junction and the actual distance between these two junctions and then rounded off to the next full kilometre.

Example :

Sankrail to Jamadoba.

	Station from & to	Reference in Pt. I & Pt. II	Distances in Kms.
i)	Sankrail to Panskura	Santragachi to Panskura sec. Pt. I	54.74 Kms
ii)	Panskura to Bhojudih	Pt. II	242.50 Kms
iii)	Bhojudih to Jamadoba	Anara – Bhojudih Sec. Pt. I	9.65 Kms
		TOTAL R/O	306.89 Kms 307 Kms.

Thus the chargeable distance ex. Sankrail to Jamadoba = 307 Kms.

THROUGH DISTANCE :

The chargeable distance from a station to and via the junction of interchange can be ascertained by adding actual distance from originating station to its adjacent junction with the actual distance from this junction to the junction of interchange and then rounded off to the next full kilometre.

Example :

A. Bondamunda to via Asansol

i) Bondamunda to via Asansol	Pt. II	...	287.87 Kms
	R/O	...	288 Kms

Example :

B. Banspani to via Bhadrak (Goods)

i) Banspani to Padapahar –	Ref. Pt.I	...	27.51 Kms
ii) Padapahar to Bhadrak (Goods) –	Ref.Pt.II	...	434.10 Kms
	TOTAL	...	461.61 Kms
	R/O	...	462 Kms

7. In case of any dispute in distance the decision of CCM shall be final.

NOTICE

Any error, alteration, addition or anomaly detected/noticed subsequently should be brought to the notice of the CCM for necessary rectification.

Distance etc. liable to alteration : All Distance, restriction of booking, routing arrangements etc. contained in the publication issued by the Indian Railway Conference Association and this Railway are liable to alteration by notification issued through IRCA Correction slips and South Eastern Railway Rate Advice, Special circular etc. as the case may be.
